Whole House Water Filtration Systems

By-pass Valve

UV Sterilizer (optional)

Sediment Filter (optional)

Chemical free water from every tap in your home

- Backwashing to keep carbon media in top condition
- NSF Certified catalytic carbon for chlorine and chloramine removal
- Require little maintenance - filter media are only changed after 3 to 5 years
- Carbon media is Tested/Certified to NSF/ANSI-61 Quality Standards
- Highest grade NSF certified carbon for organic chemical contaminant removal

NSF certified high grade granular coconut shell carbon

- Catalytic activity
- Large and extensive internal pore structure
- Optimized density
- Maximum hardness
- Low dust and turbidity
- Excellent adsorption capacity
- High volume activity
- Rapid dechlorination
- Low filtered water turbidity

Certified

100% Pure
COCONUT SHELL
carbon

4 Stage High Flow, Low Maintenance Under Counter System

UV Sterilizer

4 Stages of contaminant removal

- 1 5 Micron Pleated Sediment Filter
- 2 Refillable KDF-55 Filtration Medium
Heavy Metals - Lead, Copper, heavy metals, etc.
- 3 Refillable Activated (GAC) Filtration Medium
Chlorine, bad taste, pesticides, herbicides, insecticides, etc.
- 4 UV Sterilizer (optional)
Destroys bacteria, viruses, algae, cryptosporidium, giardia, etc.

Whole House Water Filtration

The best investment you can make for your home AND the health of your family

Ideal whole house water filtration setup

- ✓ Low maintenance cost
- ✓ Easy to install
- ✓ Chemical free water from every water source in the house
- ✓ Clean drinking, cooking and washing water
- ✓ Backwashing prevents channeling of filter media
